CANONICAL DOCUMENT OBJECT MODEL

SECTION 4.2 • OF 12

Capital Adequacy Thresholds

§4.2 • p. 11-13 • breadcrumb: Risk > Capital > Thresholds

4.2.1 TIER-1 RATIO

The Basel III framework establishes a minimum Tier-1 capital ratio of six per cent of risk-weighted assets, applied uniformly across consolidated entities of the group.

CHUNK 042 ↑

Internal policy maintains a buffer in excess of regulatory minima, calibrated quarterly by the Risk Committee. The threshold was raised to 80% in Q3, reflecting heightened counterparty exposure in the energy sector.

CHUNK 043 ↑

Tier-1 ratio progression, 2022–2026 (line chart); annotation indicates the Q3 2025 policy revision and consequent step.

CAP-FIG-04 • 720×440 • vlm: claude-haiku-vision

Compliance footnote

Quarterly attestation by the Chief Risk Officer is required and is filed with the Compliance Office no later than the 15th business day of the subsequent quarter.

CHUNK 044 ↑

4.2.2 LEVERAGE RATIO
